Teacher comments:

Good content, but we need to have better analysis in our speaking! We also need to translate the energy into better style!

Hook

- Good start with energy!
- I like that the direction hints at the limited ability of the government to give proper healthcare in certain important cases!

Clash 1: Quality

- I am unclear why your analysis answers why it's ok to not have more quantity, in the sense that, when less people can access it, especially the poor people, as prop runs!
- Good analysis that innovation is high on your side, especially because you explained how the companies do not want to lose their customers!

Clash 2:

- I am unclear why companies dropping prices of companies will not happen while decreasing quality, we need that answered!

Clash 3

 Good point that customer loyalty is kept by private companies by efficient and better quality product, well put!

Clash 4

- Good point that accountability can decrease
- But explain why your side has it more!

Style:

- We need to have more hand gestures!
- We just need to give clearer transitions when moving from one point of the other!
- We need to look at the entire audience more in our speech!

Speaking time: 4:40 – we need to speak longer!
